

# 3D PRINTING ISN'T JUST FOR PROTOTYPING ANYMORE

OUR MISSION:

## PRINTING A STRONGER FUTURE, FASTER

Our low-cost 3D printing services are available to anyone and everyone. No matter the size of your project, we provide the same exceptional service and support.

### STRONGER MATERIAL

The strength of our materials make your project perfect for end-use, not just prototypes.

### LOWER COST PER PART

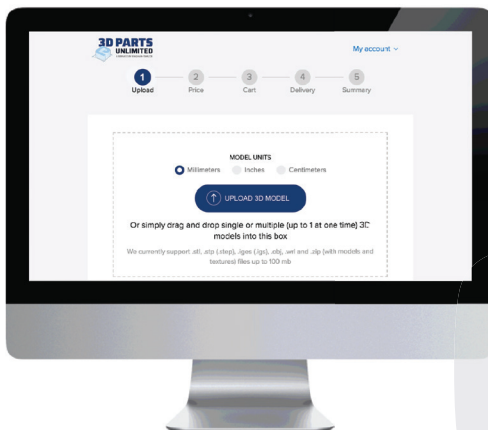

With the advancements in 3D printing, making small production runs is accessible.

### QUICK TURNAROUND

The expanded capacity and speed allows us to complete most orders in a matter of days.

# CAPABILITIES

3D Parts Unlimited leverages various technologies to produce reliable, rugged, high quality plastic & metal parts.

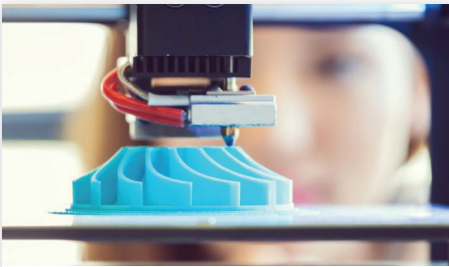

## HP MULTI JET FUSION

Designed by HP, this technology unlocks the full potential that 3D printing has to offer.

## MULTI JET PRINTING

MJP is an ink jet printing technology that utilizes photo-curable liquid polymers and supporting wax.

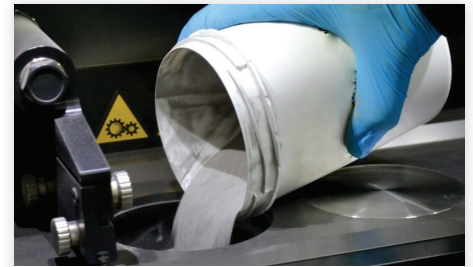

## FUSED DEPOSITION MODELING

FDM utilizes a filament that's heated in a nozzle and then extruded layer by layer until the part is fully built.

## SELECTIVE LASER SINTERING

SLS is a powder-based technology that uses a CO2 laser to sinter each layer together.

## DIRECT METAL LASER SINTERING

DMLS is ideal for creating end-use parts that hold all characteristics of regular machined metal parts.
